DATAMARS Livestock

Weighing, Reading & Pasture Management

Tru-Test DATAMARS

INDICATORS

S3

Features:

- Clear weight display in any condition
- Bluetooth® Low Energy connectivity
- Record weights and adjust settings via the app
- Rugged, waterproof design for tough environments
- Rechargeable battery with 15-hour life

JR5000

The JR5000 weigh scale indicator simplifies recording and analyzing individual animal performance using Electronic (EID) and Visual tags.
It replaces guesswork with accurate data, displaying live weight gain since the last session for immediate insights in the yard. Featuring Tru-Test's Superdamp™ IV technology, it delivers fast, precise weights—even for active animals. Built-in Bluetooth® connects seamlessly to Tru-Test EID readers for automatic ID transfer, while a durable keypad allows manual VID entry.

Features:

- Weigh stock quickly and accurately.
- Make informed decisions for individual animal management.
- Easy to use in a crush or race side with minimal training.
- Built tough for harsh agricultural environments.
- Features a large colour screen and full keypad at an entry-level price

ID5000

Take control of your livestock management with the Tru-Test ID5000 – a mid-level weigh scale designed for efficiency, accuracy, and profitability.

Features:

- Wireless EID reader connectivity up to 100m or via cable.
- Transfer data to mobile devices (Android/Apple) or computers (Windows).
- Store 1,000 sessions and 1,000,000 records.
- Record weights with EID and VID tags.

INDICATORS

XR5000

Simplify management decisions by capturing key animal data to identify under performers, optimize breeding, and detect health issues early.

Features:

- Store 1 million records across 1000 sessions, with 100 data points per animal.
- Visualise and calculate individual or group performance.
- Draft up to 10 ways by any criteria.

EID PANEL READER SYSTEM

XRP2i READER

Features:

- Reads FDX-B and HDX tags
- Can function as a standalone tag recorder and animal counter or send data to a Tru-Test Indicator
- Wireless Bluetooth® connection for easy data transfer with no cables
- Download data to PC or Android smartphone for analysis
- Plug-and-play setup with auto-tuning for consistent reads
- Flexible antenna options (different sizes, dual, and synchronized)

- Rugged design for tough agricultural environments

ANTENNAS

- Rugged design, easy to install
- Dual antenna read range up to 1,800mm
- Small: 425 x 400 x 10/33mm
- Large: 873 x 603 x 15/38mm

PORTABLE EID READERS

SRS2i STICK READER

Features:

- Stores 250,000 scanned tags with fast reads and vibrating feedback.
- Large 2.7" sunlight-readable colour LCD screen.
- Quick access keys for easy navigation.
- Bluetooth® connectivity to weigh scale indicators.
- 650mm length reach for safe scanning of lively animals.
- Download data to Windows, iOS, or Android devices.

XRS2i STICK READER

Tru-Test EID stick readers are compact, handheld devices designed to streamline livestock management. They quickly scan animal identification tags, capturing vital information with ease.

Features:

- Record up to 15 custom details per animal (e.g., breed, sex, DOB, condition score).
- Scan 1,000,000 tags with fast reads and vibrating feedback.
- Quick setup with predefined or custom job settings.
- Long-lasting battery: 19 hours push-to-read or 9.5 hours continuous reading.
- Custom alerts for specific animals (e.g., cull).
- Read up to 1,100 tags per minute.

Turn your weighing data into insights

Manage individual animal performance with our Datamars Pro App for mobile, and DATALINK software for PC.

LOAD BARS

MP600

2,000Kg capacity / 600mm (23")

MP800

3,000Kg capacity / 800mm (32")

HD5T

The HD5T Load Bars are tough, reliable, and easy to install under any crush, with no extra assistance needed. At 1,010mm wide and a 5,000kg capacity, they're perfect for heavy cattle crushes. Made from galvanized steel, they're built to withstand harsh agricultural conditions.

PLATFORMS

2.2M PLATFORM

600mm wide, durable, weld-free cattle platforms with a lightweight design for easy transport and setup, compatible with MP600 Load Bars. Also available in a 1.1m version.

PLATE METERS

Our plate meters are accurate, robust electronic rising plate meters designed to measure pasture cover in grass paddocks. They're easy to use and simple to maintain.

- **EC09** Displays the number of samples taken, average pasture height, and cover for a single paddock on-screen.
- **EC10** USB compatible for easy data transfer to your computer.
- **EC20** Bluetooth-enabled for easy connection to the Android app.
